

The Division of Vascular Surgery offers a

# Free screening for AAA—a silent killer.

You could be at risk!  
Protect yourself through early detection.

**Abdominal aortic aneurysm (AAA)** is a silent killer—this ballooning of the abdominal aorta can rupture and cause death. Research suggests that more than 1 million people are living with an undiagnosed AAA.

## Who is at risk?

You are at increased risk of AAA if you're male and:

- You smoke or used to smoke
- You're 65+ years old
- You have heart disease or “hardening of the arteries”
- You have high blood pressure
- You have a family history of AAA

If you're a woman 65+ years old with a history of smoking, talk with your doctor about whether AAA screening makes sense for you.

Join us for a **FREE AAA ultrasound screening**. Getting screened for AAA is a simple step that can save lives!

**Saturday, November 2, 2019**  
**8am – 12pm**

**Lenox Health Greenwich Village**  
**200 West 13th Street, 6th Floor**  
**New York, NY 10011**
