STOP THE SPREAD.

SAVE LIVES.

The background of the entire image is a blue-tinted, semi-transparent illustration of several coronavirus particles. These particles are spherical with a textured surface and numerous small, protruding spike proteins. They are scattered across the frame, with one particularly large and detailed particle centered in the upper half.

**Let's admit the truth
and learn the lessons –
NOW**

OUR FIRST GLOBAL PANDEMIC

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

Last November/December,
we knew China had a virus outbreak.

First Confirmed Cases in Washington & California

Travel Ban from China

First Confirmed Case in New York State

Full Travel Ban from Europe

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

Research Now Finds...

- The virus was spreading wildly in Italy in February
- Likely 28,000 cases in the United States in February, including more than 10,000 in New York
- New York strains of coronavirus came from Europe, probably Italy

STAY HOME.

A blue-toned map of Europe and North America. Several flight routes are shown as lines connecting major airports. Airport codes visible include NYC, LON, PAR, MXP, OSL, CPH, and PRG. The text is overlaid on the map.

Between the beginning of the spread
of the virus in January to the
European closedown in March –
approx. 13,000 flights from Europe landed at
New York and New Jersey airports carrying
over 2.2 million people from Europe.

- 
- Outbreak in China was November/December
 - We acted 2 months later

Does anyone really think the virus
was still waiting in China for us to act???

STOP THE SPREAD.

SAVE LIVES.

A photograph of a dark-colored horse running across a grassy field. The horse is captured in mid-stride, with its front legs extended forward and its tail slightly raised. The background shows a fence and bare trees, suggesting a rural or farm setting. The entire image is covered with a semi-transparent blue overlay.

The horse had already
left the barn.

Whose job is it to warn us of a
global pandemic?

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

The background of the entire image is a solid blue color. Overlaid on this background are several stylized, semi-transparent illustrations of coronavirus particles. These particles are spherical with a textured surface and have several small, protruding spike-like structures. They are scattered across the frame, with some appearing larger and more detailed than others, creating a sense of depth and presence.

It can
happen again!

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

The background of the entire slide is a dark blue field filled with numerous translucent, 3D-rendered images of coronavirus particles. These particles are spherical with a textured, bumpy surface and several thin, protruding spikes or 'legs' extending from them. The particles are scattered across the frame, with some appearing larger and more detailed than others, creating a sense of depth and a microscopic environment.

In the Meantime...

How long
does the virus live?

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

How Long Does the Virus Live?

- Up 72 hours on plastic and stainless steel 
- Up to 24 hours on cardboard 
- Up to 4 hours on materials like copper 
- And hang out as droplets in the air for up to three hours before they fall. 

Evidence also shows that many who carry and spread the virus had few or no symptoms at all.

SAVE LIVES.

Looking Ahead

- Earlier this month, I issued an Executive Order allowing all New Yorkers to **vote absentee** in the June 23rd primaries.
- Today, I am issuing an Executive Order to make sure every New Yorker **automatically receives** a postage-paid application to receive a ballot.

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

Looking Ahead

- More testing
- Watch the spread of the virus
- Social distancing

STAY HOME.

STOP THE SPREAD.

SAVE LIVES.

Looking Ahead

- We will reopen and rebuild – not what was, but **better and smarter**.
- **We're thinking now about:**
 - Better healthcare
 - Better transportation
 - Smarter telemedicine
 - Smarter tech in education
