

2ND part letter #3 (2x) 18cr820 (JSR) 03-29-2019 (1)

US Your Honor Ted S. Rakoff

I am taking full responsibility. I never want to make excuses for my actions. I am going to answer your question Your Honor.

What would prevent these fireworks from exploding? They would not hurt anyone. The devices consisted of low level very small amount of Sparkler fireworks, lawn fruit Glass Powder fertilizer mix & Pool Shock. ~~There~~

~~was no way for devices to catch fire.~~ From FBI Frensic Report

According to Frensic report by FBI: their saying the only way these devices could of have exploded was through direct contact with heat.

Where these devices were sent that is a Hypothetical sceinario. Hypothetical is what if Frensic is suppose to be exact Science. Situation (a what if)

(JRP 058 102)
②
 there was heat none of them exploded. Because of improper connections. On ~~purpose~~ purpose. Forensic is suppose to be exact science. But they are applying Hypothetical situation

(a what if)

Just like a doctors determines through test what is wrong with you. Just like all receipts of the devices. There was no heat. IT IS none explosive device.

Hypothetical - an assumption

Where ever the devices went was temperature controlled

It was in a mail truck, it did not explode. IT was outside in the mail, it did not explode. It was in P.O. Box, IT Did not explode. Plus the devices

③

Were sent in winter in October, 2018 it was very cold. Plus it was not connected correctly on purpose. Hypothetical (is what it)

What type of heat does it have to in order to explode or to be desert heat, or Sahara heat.

Glass is also Powders Asbestos, FBI SAID:

As Submitted Device would not have functioned as a result of its design. The fuzing system lacked the proper components & assembly to enable it to function as a method of initiation for this device. I can't be determined if the non-functional fuzing system is a result of poor design or intent of the builder. According to the Forensic Experts the devices were inoperable, a could not have worked. I take full responsibility for that. Although I could have handled the threats

(4)

that was happening to
myself in a better way.
But in my delusions, I
felt that this was a way
to get these people off
my back. I have a world
of respect for you Your
Honor, For the Government,
& my attorneys.

Sincerely:
Cesar Altieri Lopez Jr.
